7inch wide screen, TFT Color LCD type Graphic panel + PLC function Logic panel LP-S070

Features

- Supports cost reducing, space saving, easy control by PLC+HMI+I/O module integration
- Adopts 7 inch wide TFT LCD for realizing True Color with 16,777,216 colors
- Analog touch method : Free tag arrangement than matrix touch method
- Supports basic I/O of input 16 points, output 16 points
 Supports several device
- (auxiliary device 10K Word, data device 10K Word, etc)
 Built-in large capacity memory
- (program memory : 8,000 step, drawing memory : 16MB)
 Built-in position control function
- : Provides simultaneous output for max.100kHz pulse 2 points
- Easy software upgrade at website
 - (1) LP firmware file

- (2) GP Editor (drawing program)(4) Additional protocol
- (3) SmartStudio (Logic program)(5) Language and font, etc
- Data logger function
- : Supports data gathering and backup of controller
- Supports variable image library
- Enables to monitor multi station and multi channel at the same time
- Supports several interface
 - : Easy to connect various external devices with RS232C 2 ports and RS232C/RS422 multi communication port : Enables to extension additional external I/O (when connecting Autonics ARM Series, one communication cable enables to extend 64-point per an address, up to 31-address)

- Supports several fonts: Supports window true type and several bitmap font (Selectable)
- Device monitoring function : Enables to monitor/control variable of connected control through communication port
- Printer/Barcode reader connection: Enables to print out alarm history, to read barcode

Please read "Caution for your safety" in operation manual before using.	(E	

Manual

Visit our webwite(www.autonics.com) to download 'GP Editor user manual' or 'SmartStudio user manual', 'SmartStudio programing manual', 'LP Series command manual', 'LP-S070 user manual', 'GP, LP user manual for communication'.

- GP Editor user manual
- It describes how to write screen data, and is about related usage of LP-S070 HMI function.
- SmartStudio user manual, SmartStudio programming manual, LP Series command manual It contains install method and usage, commands, etc of SmartStudio.
- GP, LP user manual for communication : It describes connection for external devices such as PLC.
- LP-S070 user manual : It describes general information on the installation and usage of LP-S070 and system Contents.

Functional description

Figure display		Line, rectangle, circle, text, bitmap				
	Numeral display	Displays the designated device as numerical value.(decimal, hexadecimal, octal, binary, real number)				
	ASCII display	Displays the designated device value as ASCII character.				
	Time display	Displays current time or date.				
	Alarm history	Registers alarm history.				
	Alarm list	Displays generated (not backed up) alarm.				
	Comment display	Displays the designated comment as device status or value.				
	Lamp	Displays lamp as device status.				
ß	Part display	Displays the designated parts as device status and value.				
ца.	Line graph	Displays several device values with a graph of broken line.				
	Trend graph	Displays change of device value for time with a graph of broken line.				
	Bar graph	Displays a device value with a bar graph.				
	Statistic graph	Displays a ratio of several device values with pie graph.				
	Panel meter	Displays a device value as panel meter.				
	Touch key	Screen is switched, word/bit device values are set when it touched.				
	Numeral input	Configures user input value in device.				
	ASCII input	Configures user input ASCII code value in device.				
Sy	stem information function	Monitors/Controls LP operation from PLC.				
Recipe function		Reads/Writes several PLC device collectively.				
Security function		Only acceptable user can observe/operate important data.				
Barcode read function		Connects barcode reader, read barcode.				
Floating alarm function		Warning message is floated when alarm is generated.				
Time operation		Specific bit device is ON/OFF for designated day and time.				
Overlap window		Available to form dynamically overlapping another base screen on the base one.

Logic Panel

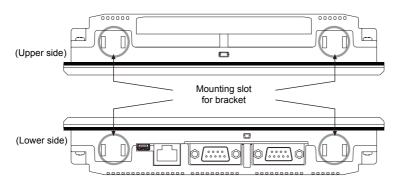

Part description

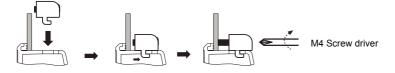

- Ethernet port : For connecting LAN cable and hub, use direct cable, and for connecting PC direcly, use cross cable.
- USB Device : It is used to upload and download project(It is required to install USB driver on PC), and when connect to PC, it can be used as a USB memory(PC recognizes it as a removable disk).
- USB Host: It used to manage data and upgrade firmware.
- RS232C, RS422 port: For more information, refer to R-32 page and 'ESerial interface' of GP/LP common features.

Installation

- 1. Set LP-S070 in panel.
- 2. Set fixing brackets in 4 slots(2 slots is in upper side, 2 slots is in lower side).

3. Tighten fixing bracket with M4 screw driver and tightening torque is 0.3 to 0.5N m.

Input Output wiring

- © LP-S070-T9D6(7)-C5R
- Input wiring(source type input module)

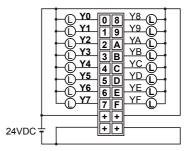

© LP-S070-T9D6(7)-C5T

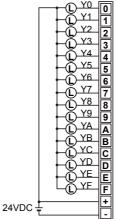

• Input wiring(source type input module)

• Output wiring(sink type output module)

• Output wiring(sink type output module)

%Check the pin number of the case before wiring.

Sold separately I/O terminal block and I/O cable

Suitable I/O terminal block	INPUT/OUTPUT	Suitable I/O cable			
AFS-H20	INPUT				
(Interface terminal block)	OUTPUT				
ABS-H16PA(TN)-NN (Relay terminal block)	OUTPUT	CJ-HPHP20-V1N□-1APR			
AFE4-H20-16LF	INPUT	CJ-HPHP20-V1N□-1BNR			
(Sensor connector terminal block)	OUTPUT	CJ-HPHP20-V1N1APR			
		CJ-HP20-VP□-R (OPEN type cable)			
		CJ-HP20-VP□-L (OPEN type cable)			

XIt is only for ribbon cable connector (hirose connector) type.

""" is for cable length. (Basic specification **010** : 1m, **020** : 2m, the others are option) For more information, refer to "I/O terminal block & cable catalog".

© Communication cable (RS232C, RS422 port)

For serial connectable cable to connect PLC and external devices, refer to the R-32 page for "GP/LP communication cable".
