PRDCM Series Long Distance Connector type

Long distance connector type proximity sensor

■ Features
- **Long sensing distance (1.5 to 2 times longer sensing distance guaranteed compared to existing models)**
- Advanced durability as comprehensive existing case and rear cap structure `Upgrade`
- Easy to check operation from various angles with 4-side LED `Upgrade`
- Shorten the time of maintenance
- Improved the noise resistance with dedicated IC
- Built-in surge protection, reverse polarity protection, overcurrent protection circuit
- Red LED operation indicator
- Protection structure IP67(IEC standard)

⚠ **Please read "Caution for your safety" in operation manual before using.**

Unit weight[3] — Upgrade	Approx. 15.5g	Approx. 15g	Approx. 23.5g	Approx. 22g	Approx. 46.5g	Approx. 42.5g	Approx. 160g	Approx. 165g

※1: PRDCMT series is going to upgrade performance(4-side LED) and structure(comprehensive existing case and rear cap type).
※2: The response frequency is the average value. The standard sensing target is used and the width is set as 2 times of the standard sensing target, 1/2 of the sensing distance for the distance.
※3: **Upgrade unit weight is only for PRDCMT(Upgrade). Refer to the existing unit weight for the other models or existing products.**
※Environment resistance is rated at no freezing or condensation.

PRDCM Series

■ Control output diagram

◎ DC 2-wire type

◎ DC 3-wire type

NPN output type
PNP output type
※The number in a circle is pin no. of connector.

■ Wiring diagram

◎ DC 2-wire type(Standard type)

Normally Open(N.O.) / Normally Closed(N.C.)

※Pin ①, ② are not used terminals.
※For DC 3-wire type connector cable, it is available to use with black wire(12-24VDC) and blue wire(0V).

◎ DC 3-wire type

NPN output type	PNP output type

※Please fasten the cleat of connector not to shown the thread. (0.39 to 0.49N·m)

◎ DC 2-wire type(IEC standard type)

Normally Open(N.O.)	Normally Closed(N.C.)

※②,③ of N.O. type and ③,④ of N.C. type are not used terminals.
※The pin arrangement of connector applying IEC standard is being developed.
※Please attach "I" at the end of the name of standard type for purchasing the IEC standard product.
  Ex)PRDCMT12-4DO-I
※The connector cable for IEC standard is being developed. Please attach "I' at the end of the name of standard type.
 Ex)CID2-2-I, CLD2-5-I

※Please fasten the vibration part with Teflon tape.
※Refer to the G-6 page about IEC standard connector wires and specifications.

Long Distance Connector type
■ Proper usage

◎ Load connections

**< DC 2-wire type >**   **< DC 2-wire type >**

When using DC 2-wire type proximity sensor, the load must be connected otherwise internal components may be damaged. The load can be connected to either wire.

◎ In case of the load current is small

● DC 2-wire type

It may cause return failure of load by residual voltage. If the load current is under 5mA, please make sure the residual voltage is less than the return voltage of the load by connecting a bleeder resistor in parallel with the load as shown in the diagram.

$$R = \frac{Vs}{I} \ (\Omega) \qquad P = \frac{Vs^2}{R} \ (W)$$

[I:Action current of load, R:Bleeder resistance, P:Permissible power]

Please make the current on proximity sensor smaller than the return current of load by connecting a bleeder resistor in parallel.

※W value of Bleeder resistor should be bigger for proper heat dissipation.

$$R = \frac{Vs}{Io\text{-}Ioff} \ (\Omega) \qquad P = \frac{Vs^2}{R} \ (W)$$

$$\left[\begin{array}{ll} Vs \ : \text{Power supply}, & Io : \text{Min. action current of proximity sensor,} \\ Ioff : \text{Return current of load}, & P : \text{Number of Bleeder resistance watt} \end{array} \right]$$

◎ Mutual-interference & Influence by surrounding metals

When several proximity sensors are mounted close to one another a malfunction of the may be caused due to mutual interference. Therefore, be sure to provide a minimum distance between the two sensors as below chart indicates.

Face to Face

Parallel B
When sensors are mounted on metallic panel, you must prevent the sensors from being affected by any metallic object except target. Therefore, be sure to provide a minimum distance as below chart indicates.
